English

Zstash

Multivendor ecommerce website, where can buyer as a seller and can sell as well as buy, seller as a buyer can buy as well as sell to this platform. I have worked in this project with seniors by using php framework.

Vintage Bazaar

It is also a multivendor ecommerce website. But here is the one more additional features. Here buyer can bid on the product. If seller can accept for that particular product. Then that product deliver according to that bid amount. One more thing available both facility shipping and meet up.
